

MY HERO VR for GOOD

A Resource Guide for Virtual Reality in the Classroom

Virtual Reality is a new tool that is being researched for use in many different disciplines. Researchers and developers are looking into its use in Gaming, Psychology, Medicine, Storytelling, Education, and more.

MY HERO VR Educator Guides are designed to help educators lead activities that build empathy, promote activism, provide inspiration, harbor innovation, and promote best practices using this new technology. This resource guide is a starting point to bring Virtual Reality into the classroom.

Equipment

Using a computer, tablet, or Smartphone

Head Mounted Displays using a computer

Head Mounted Displays (HMD) offer a high resolution immersive experience by blocking out the outside environment. There is Facebook's Oculus Rift (pre order \$600) and the HTC Valve (\$800). Computer specifications vary but mostly center around a Windows computer with a substantial Graphics card. Laptops can work. There are specifications listed , check these links:

Facebook Oculus <https://www.oculus.com/en-us/oculus-ready-pcs/>

HTC Vive <http://store.steampowered.com/app/358040>

Display Devices using a Smartphone

For 360 experiences and other VR applications you can use low cost and disposable devices like The Samsung Gear VR powered by oculus which sells for \$99, or the Google Cardboard (\$15). There are other devices like the Mattel Viewmaster (\$29) as well.
